

Standards Compliance	General Requirements	Air Quality	Filtration	Electrical Safety
	EN 12469, Europe	ISO 14644.1, Class 3, Worldwide IEST-G-CC1001, Worldwide IEST-G-CC1002, Worldwide	EN-1822 (H14), Europe IEST-RP-CC001.3, USA IEST-RP-CC007.1, USA IEST-RP-CC034.1, USA	UL-C-61010A-1, USA CSA C22.2, No.1010-92, Canada EN-61010-1, Europe IEC61010-1, International

Sentinel™ Silver Microprocessor Controller

- Displays all safety information on one screen
- Centered and angled down for easy reach and viewing

Curved Corner

- Large corner radius for easy cleaning
- Stainless steel 304 interior walls (with available option for SS 316)

Multi-piece Work Tray

- Easy to lift and clean
- Stainless steel 304 work trays (with available option for SS 316)
- Customization to single-piece work tray is possible, please contact Esco

Raised Arm Rest

- Helps prevent grills blocking
- Comfortable working posture

Standard stand comes with casters and leveling feet

- Casters for easier moving/transfer of cabinet
- Leveling feet allows height adjustment in cases of uneven floors

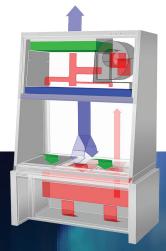

Available in 1.2 m and 1.8 m width (4' and 6' models)

Tri-filter System

- Equipped with 1 supply downflow filter and 2 exhaust filters
- Dual long life ULPA filters (as per IEST-RP-CC001.3 or H14 as per EN 1822) for supply and exhaust filters
- V-bank design ULPA filter as per IEST-RP-CC001.3 or H14 filter as per EN 1822 for below work zone exhaust filter

Cytoculture

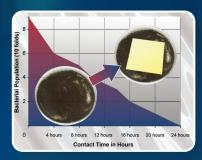

Airflow Sensor

- Monitors real-time airflow for safety
- Alert the user if airflow is insufficient
- High-end Accusense sensor made by Degree C

ISOCIDE™ Powder Coat

- Silver-ion impregnated powder coat
- Inhibit microbial growth to improve safety

 Easier closing and opening of sash, just by pressing the button help simplify use of the cabinet

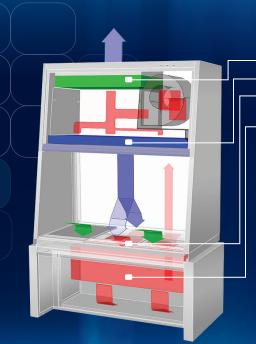

Exhaust HEPA filter

 With additional V-bank HEPA filter below work zone

Cytoculture® Cytotoxic Safety Cabinet

Cytoculture® Cytotoxic Safety Cabinet Airflow

Secondary exhaust filter

Supply filter

Dynamic air barrier, inflow and forward directed downflow air converge

Primary exhaust filter

ULPA-filtered air

Unfiltered / potentially contaminated air

Room air / Inflow air

Air enters the cabinet through perforations located along the front of the work zone before mixing with used downflow air in a common chamber below the work zone (this inflow air does not mix with the filtered downflow air in the cabinets main chamber). The mixed air then passes through the first stage exhaust fiter located beneath the work zone

■ The filtered air then passes through internal ducting in the back wall of the cabinet to a common air plenum where ~30% is exhausted

through the second stage exhaust filter and ~70% is forced evenly through the supply filter. This sterilized air then passes through the main chamber as downflow air, flushing all contaminates from the work zone.

At the work surface the downflow airstream splits and enters the common air chamber beneath the work zone through perforations located at the front and back of the main chamber, from where the cycle is repeated.

Touchpad data entry buttons permit control

settings and access to diagnostics, default settings and hierarchical menus.

Color coded indicator lamps display green for primary function (fan operation); blue for secondary function (LED lights and electrical outlet); and orange for caution (UV lamp ON). Programmable automatic UV light timer simplifies operation, enhances contamination control, extends UV lamp life and saves energy.

A graphical interface indicates cabinet performance.

Digital read-out with alpha-numeric display indicates all input, status and alarm functions

All functions can be user activated through touch-pad programming access; see Operations Manual.

Sentinel™ Silver Microprocessor Control System, Programmable

- When programmed ON
 - the start-up sequence confirms status with Air Safe and local time display.
 - the Personal Identification Number (PIN) access restricts unauthorized adjustments.
 - an airflow alarm warns of deviations from normal velocities.

Accessories for Cytoculture® Cytotoxic Safety Cabinets				
Model		CYT-6A		
Anti-blowback Valve	ABBV-10P	5170352

After-Sales Services

Parts Availability

Whenever service is needed and parts are required, minimizing downtime is a critical objective. Statistical usage analysis helps Esco to predict parts life, permitting Esco to manage logistics and stage proper inventories around the world. The combination of predictive maintenance, historical data, and geospecific proximity assures our customers that parts and labor are available whenever service is scheduled through the local sales organization.

Registration, Documentation, and Instruction

Quality control at Esco extends from research and development through engineering, manufacturing, shipment, delivery, and customer feedback. Esco maintains an aggressive program to encourage warranty card registration by mail, email or online submission so that we know where Esco products are located and how they are being used. Rest assured that all information disclosed from warranty registrations will be kept confidential. All Esco products include unique serial numbers for identification. Documentation for all performance tests is archived and maintained for customer reference with all the backup procedures.

Online Technical Information

Site preparation instructions are useful before product arrival and installation. Installation and start-up manuals, operation manuals and quick reference quides are available anytime from the Esco resources online.

NSF International Accreditations and TÜV Nord Certification

The National Sanitation Foundation (NSF) International is an independent, non-profit organization that provides standards development, product certification, auditing, education, and risk management for public health and the environment.

The NSF mark is your assurance that the product complies with all the standard requirements, tested by one of the most respected independent certification organizations in existence today. NSF conducts periodic unannounced inspections and product testing to verify that the product continues to comply with the standard. It is valued by consumers, manufacturers, retailers, and regulatory agencies worldwide.

TÜV NORD GS certification has been helping to minimize risks and hence ensure maximum safety and quality. TÜV NORD's recognised certifications stand worldwide for an exemplary level of safety and make a valuable contribution to the continuing improvement of products and processes.

Esco has passed the stringent requirements during testing and inspection and has given the TÜV NORD approval mark that confirms compliance of the product with the provisions of the Product and Equipment Safety Act as regards health and safety.

In line with Esco's commitment in providing world-class services worldwide, Esco as a manufacturer feels the impact of providing the best after-sales service through our competent service engineers. Thus, Esco is the only manufacturer in the world with the most number of NSF accredited certifiers across the globe. In addition, Esco enhances the capacity to the highest quality of service by providing TÜV NORD GS certified service engineers with expertise to ensure timely preventive and corrective maintenance of the laboratory equipment. These accreditations make Esco not only an Excellent Standards COmpany but also an Excellent Service COmpany, which exemplifies Esco's collective quest of being an Eternally Successful COmpany.

Customized to Meet Your Specific Needs

Esco CYT cabinets can be configured to meet unique needs including:

- Lead shielding for nuclear medicine applications.
- An optional carbon filter impregnated with KI (potassium iodide) in place of the additional HEPA filter (this configuration does not protect service technicians when changing contaminated filters).

Comprehensive Performance Testing At Esco

Every Cytoculture™ CYT model manufactured by Esco is individually tested, documented by serial number and validated with the following test methods.

- Inflow / downflow velocity
- PAO aerosol challenge for filter integrity
- Airflow pattern visualization
- Electrical safety to IEC61010-1
- Additional KI-Discus containment and microbiological testing is performed on statistical sampling basis.

Since 1978, Esco has emerged as a leader in the development of controlled environment, laboratory and pharmaceutical equipment solutions. Products sold in more than 100 countries include biological safety cabinets, fume hoods, ductless fume hoods, laminar flow clean benches, animal containment workstations, cytotoxic cabinets, hospital pharmacy isolators, and PCR cabinets and instrumentation. With the most extensive product line in the industry, Esco has passed more tests, in more languages, for more certifications, throughout more countries than any biosafety cabinet manufacturer in the world. Esco remains dedicated to delivering innovative solutions for the clinical, life science, research and industrial laboratory community.
